THE BIGGER PICTURE

Green logistics moves goods with less impact

The goal is practical: keep delivery convenient while reducing what the journey leaves behind.

Move smarter

Transport products efficiently and reduce pollution along the route.

Reuse packaging

Pair sustainable transportation with packaging that returns.

Use fewer resources

Reduce waste and energy use across the delivery journey.

Keep it convenient

Protect the environment without losing delivery convenience.

Made with GAMMA

THE PROBLEM

Most single-use packaging is discarded after one delivery

Many layers, one delivery

Online orders often arrive with plastic covers, bubble wrap, and disposable boxes.

Waste accumulates quickly

One delivery can create several pieces of packaging waste.

Disposal becomes the next burden

More waste means more disposal pressure and environmental pollution.

A one-time cost mindset

The current model treats packaging as a one-time cost.

Made with GAMMA

THE ECO PACK LOOP

EcoPack turns packaging into a reusable loop

One box, many delivery cycles.

1

Pack

Products go into a reusable delivery box.

2

Deliver

The box travels with the order to the customer.

3

Collect

The empty box is picked up after delivery.

4

Reuse

Inspection confirms it is ready for the next order.

Made with GAMMA

TRACKED JOURNEY

One tracked box connects the whole delivery journey

01

Seller prepares

The order is packed in a reusable EcoPack box.

02

Partner delivers

The delivery partner transports the box to the customer.

03

Customer requests

The customer requests a box pickup after delivery.

04

Inspection confirms

The box is checked and marked ready for reuse.

The proposed web application tracks box status and pickup requests.

Sample QR-coded box concept

Concept only. Real QR scanning is not claimed as implemented.

THE VISIBILITY LAYER

A simple web app makes reuse visible

One dashboard gives the team a shared view of the reusable packaging system.

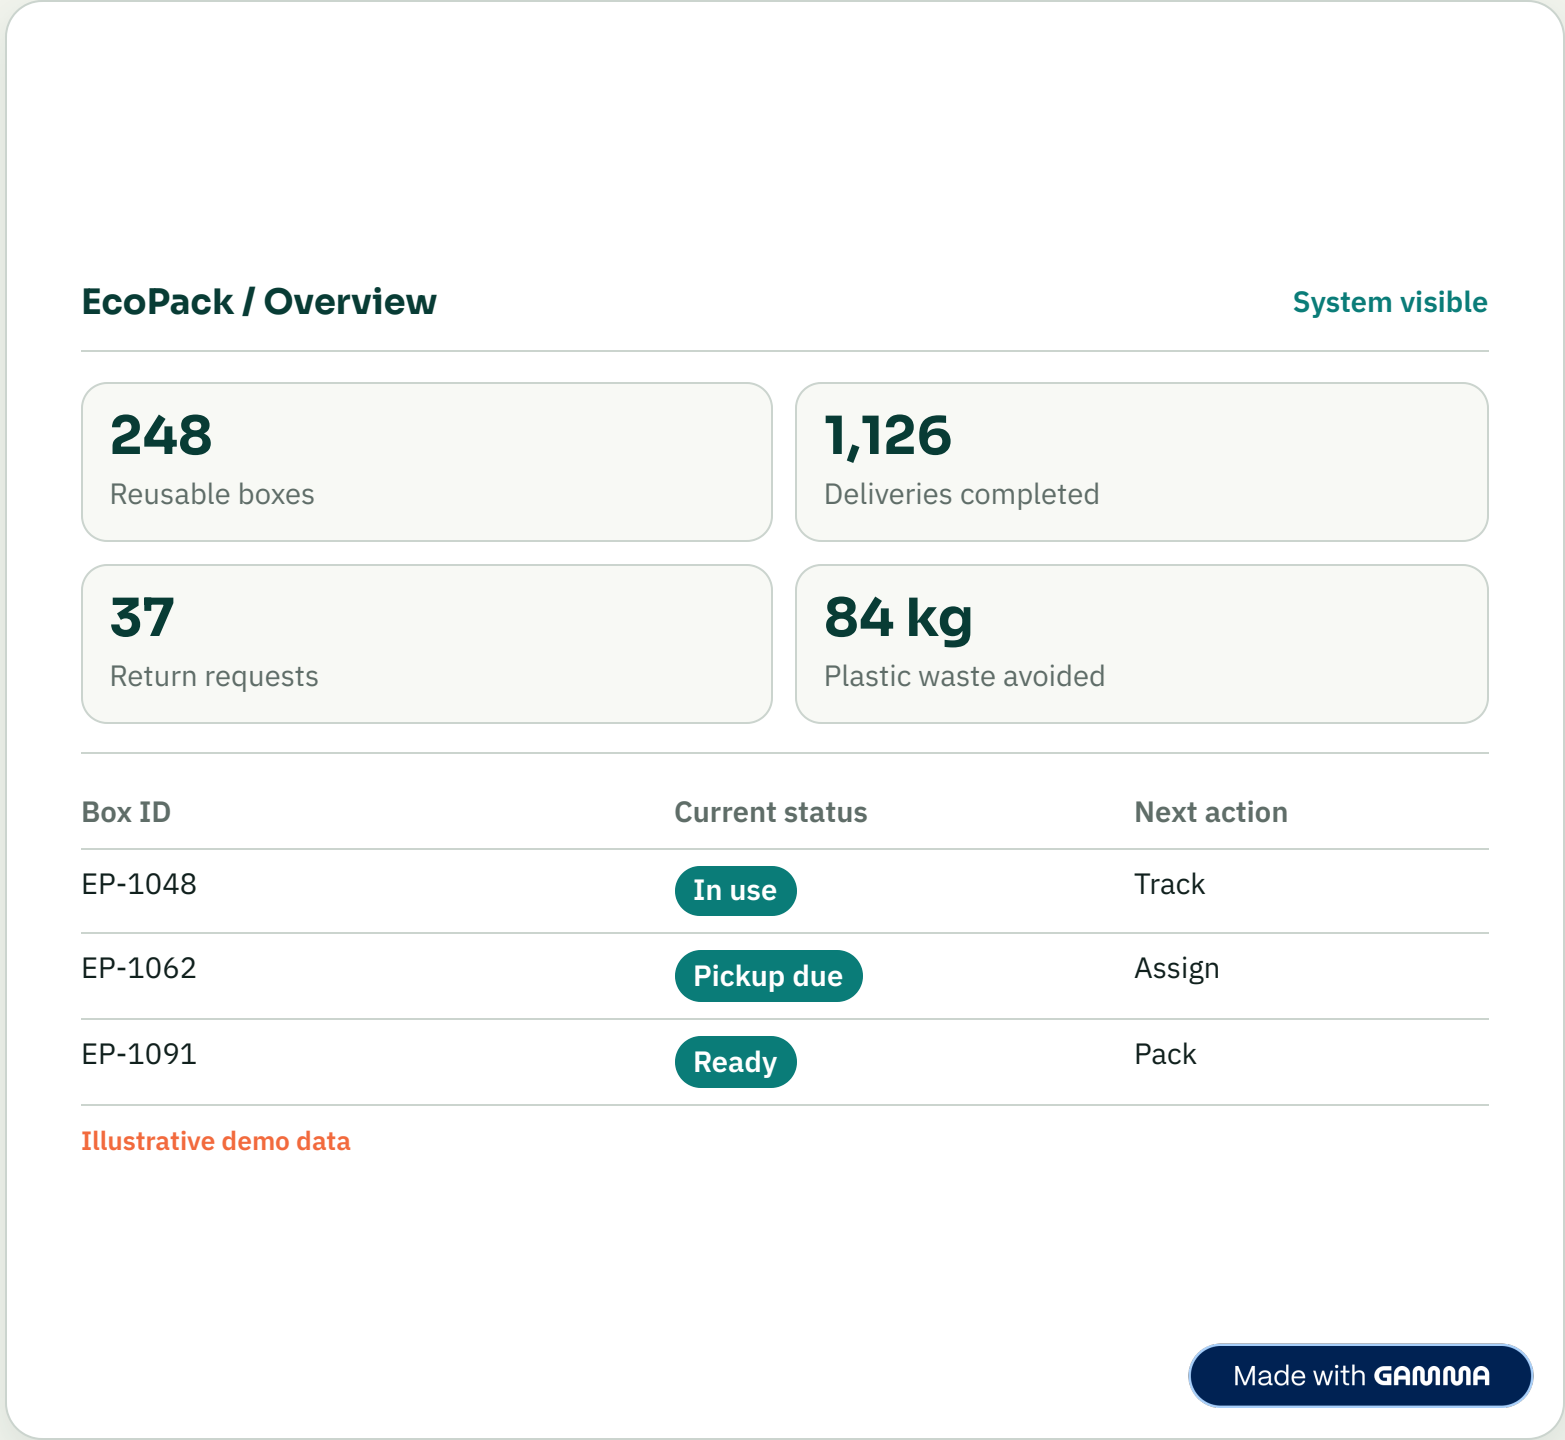

Total reusable boxes

Deliveries completed

Box return requests

Estimated plastic waste avoided

All dashboard numbers are illustrative demo data, not measured project results.

THE TAKEAWAY

Making logistics greener with EcoPack

Reusable packaging replaces a one-delivery mindset with a reuse cycle.

A simple web application coordinates box status and returns.

Our aim: reduce packaging waste, encourage reuse, and support greener delivery.

Reuse Today, Protect Tomorrow.

OUR ECO PACK WEB APPLICATION

Our Web Application – EcoPack

A Smart Solution for Reusable Packaging Management

Our EcoPack web application helps demonstrate reusable packaging management, box return tracking, and estimated waste reduction.
